DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

601-607 Chase Street is a group of four row houses. Each building is three stories high and two bays wide. They have shed roofs and are composed of stretcher bond. The windows have four-over-four lights with arched lintels. The first storey facade of 601 is a storefront. The remaining buildings have single-leaf doors with arched transoms. The cornice of each building is bracketed with a decorative frieze. Building 601 has a pendant on its cornice. 603 and 607 have their doors located in the right bay and have marble steps. The facade of 605 is covered in formstone and the door is in the left bay. The arched window panes of 607 probably exhibit the original design of the fenestration of the entire set. With the exception of 607, the buildings appear to be vacant.

----------------	--------	-------------------

STATEMENT OF SIGNIFICANCE

These buildings are typical rowhouses with plain cornices. They date from around 1885. An interesting feature is the intact coal doors composed of cast iron which are rapidly disappearing in Baltimore. The arched window panes of 607 probably exhibit the original design of the fenestration of the entire set.
